

Highfive

Meetings Reimagined™

Highfive has reimagined meeting room collaboration, improving the ease and quality of in-room video conferencing so teams are empowered to do more. Our technology is born and hosted in the cloud with a focus on simplicity – our solution is extremely easy to use with one-click start, simple in-room and remote sharing, and meeting access with no downloads or pin codes required. We deliver our solution through subscription bundles that include hardware, software, user licenses, warranties, updates, onboarding and support.

## VIDEO CONFERENCING WITH NO LIMITS

- ✓ Unlimited user licenses
- ✓ Unlimited video/domestic + international dial-in
- ✓ Unlimited screen sharing + call recording
- ✓ Free desktop + mobile software
- ✓ Software updates + hardware warranties for life
- ✓ Enablement + adoption services included

### WHY CUSTOMERS CHOOSE HIGHFIVE

#### Cost Effective and Predictable

- Subscribe by the room and get hardware, software, user licenses, warranty, firmware updates, support, and ongoing adoption services for the life of the subscription with zero hidden costs
- Efficiently scale across rooms, offices, and locations at a fraction of the cost of other solutions

#### Easy to Manage and Use

- Quick deployment, automatic updates, and no-hassle administration
- Elegant design that drives high user adoption – 80% of Highfive meetings are video enabled

#### Service Excellence

- Services, support and maintenance from a single vendor
- WebRTC backbone with end-to-end security built in and always active

### KEY FEATURES AND BENEFITS

#### Unlimited Audio, Web and Video

We have all the collaboration features you need, including desktop and mobile apps, screen sharing, Call Me, and call recordings. Enjoy these features, along with unlimited meetings and minutes, at no additional cost and with no limits.

#### Seamless Mobile to In-Room Meeting Transitions

With Highfive, you can easily move an in-progress meeting from mobile device or laptop up to a meeting room television with a few clicks. Stay connected no matter where in the office or world you are.

#### Crystal-Clear Audio

Powered by Dolby's award-winning voice and sound technologies, you'll get crystal-clear distortion-free audio. Spatial audio separation enables remote attendees to hear every word and whisper, so they feel like they're right in the room.

#### Interoperability

Join SIP-enabled meetings from Webex, Zoom, or BlueJeans right from your Highfive meeting space. We also interoperate with on-premise SIP endpoints, including Cisco and Polycom, so you can extend your technology investments.

#### One Tap to Join

Easily join meetings directly from your browser by simply clicking on a Highfive URL. No pin codes, passwords, or downloads needed. You can also quickly join a meeting with a single tap on the Dolby Conference Phone.

#### Productivity App Integrations

Easily schedule meetings and invite others with the Outlook, Office 365 and Google calendar integrations. You can also seamlessly transition from chat to video within Microsoft Teams and Slack.

"Several times in the past we had explored video conference offerings and each time we found them to be cobbled together, overly complicated and/or wildly expensive. Finding Highfive was an "ah ha!" moment – a complete, turnkey solution that checks all the boxes."

Dave Lippard, Director of IT  
AUTISM SOCIETY OF NORTH CAROLINA
